Start the year with Raina

20 prompts for a smoother back-to-school season

Heading back to school comes with a lot to plan, write, organize, and remember. The good news? Raina, your AI assistant built for the classroom, can help.

These 20 ready-to-use prompts cover everything from first-week routines and family communication to classroom AI expectations.

Here's how to use this prompt pack:

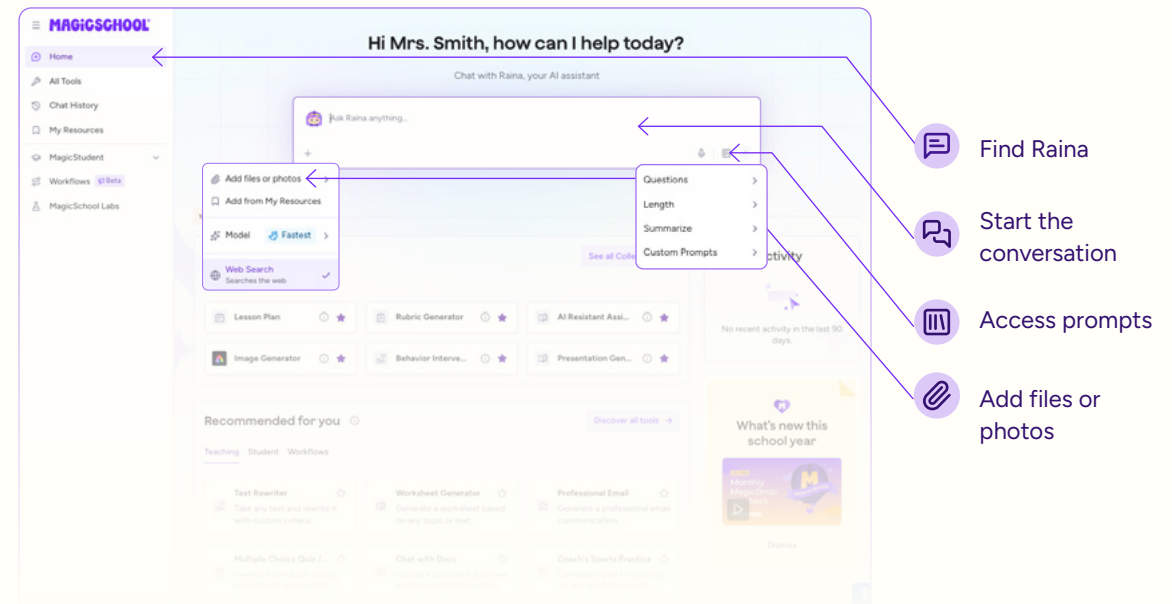

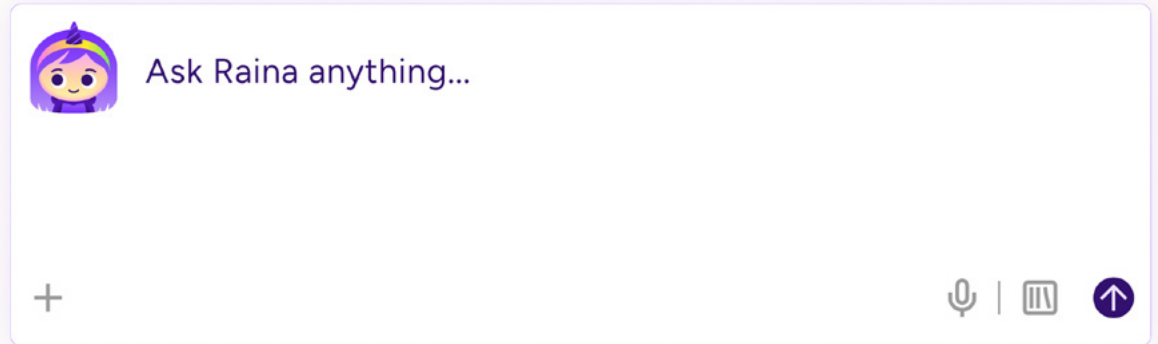

- ✓ Choose what you're working on
- ✓ Personalize the details *[in brackets]*
- ✓ Paste the prompt into Raina
- ✓ She'll help you find the right tool and turn your idea into a strong first draft

You can also skip the prompt and tell Raina what you need in your own words. Your recent work and most-used tools will be waiting when you come back, so it's easy to pick up where you left off.

Get prompts

Your back-to-school shortcut starts here:

Start the school year strong

Get your first week mapped out, establish classroom rhythms, and help everyone settle in.

Paste your prompt into Raina.

Ask Raina anything...

To do:

Copy this prompt:

Map out a great first week

Act as a *[grade level]* teacher getting ready for the first week of school. Create a five-day plan that balances community-building, classroom routines, and introductory learning activities. Include a clear goal and one low-prep activity for each day. Keep the week welcoming, engaging, and manageable for everyone, including me!

Make routines second nature

Act as an experienced *[grade level]* teacher. Create simple, student-friendly routines for *[entering class, transitions, independent work, asking for help, and dismissal]*. Explain what students should do and suggest a quick, engaging way to practice each routine as a class.

Break the ice (without the awkwardness)

Act as a teacher building an inclusive classroom community. Design a 20-minute activity that helps *[grade level]* students get to know one another without putting anyone on the spot. Include materials, step-by-step directions, and three fun reflection questions.

Turn expectations into a team effort

Act as a *[grade level]* teacher introducing classroom expectations. Turn the following expectations into a short, positive message that shows students how they can help create a great classroom. Use clear, age-appropriate language and include a quick activity that invites students to add their ideas. *[Insert expectations]*

Get to know your students

Discover what students know, what lights them up, and where a little extra support could make a big difference.

Paste your prompt into Raina.

Ask Raina anything...

To do:

Copy this prompt:

Learn every student's name

Act as a creative **[grade level]** teacher. Design a quick, inclusive activity that will help me learn students' names and help students learn one another's. Avoid activities that put anyone on the spot. Include simple directions and an option for students who may feel shy or anxious.

Learn what makes your class tick

Act as a teacher getting to know a new class. Create a short, engaging survey for **[grade level]** students that asks about their interests, learning preferences, strengths, and areas where they may want support. Add two fun questions that let their personalities shine.

See what students already know

Act as a **[grade level]** **[subject]** teacher. Create a low-pressure beginning-of-year check-in that helps me understand what students already know about **[topic]**. Include six questions with a mix of response formats and a simple guide to help me spot strengths, gaps, and next steps.

Uncover the "almost got it" moments

Act as an instructional coach supporting a **[grade level]** **[subject]** teacher. Identify five common misconceptions students may have about **[topic]**. For each one, suggest a question or activity that can bring it to light and an easy way to help students make the connection.

Find your "wow!": From small wins to big breakthroughs, see what's possible for your classrooms, schools, and students this school year.

Build family connections

Start the year with warm, clear communication that helps families feel informed and part of the team.

Paste your prompt into Raina.

Ask Raina anything...

To do:

Copy this prompt:

Send a warm family welcome

Act as a *[grade level]* teacher welcoming families to a new school year. Write a friendly letter that introduces me, shares what students can look forward to, and explains how families can reach me. Keep it warm, clear, and easy to skim. Include the following details: *[Insert details]*

Learn from the people who know your students best

Act as a teacher getting to know the families of *[grade level]* students. Create a short, welcoming survey that asks about each student's strengths, interests, needs, and anything their family would like me to know. Keep the questions thoughtful and easy to answer.

Make the first-week update easy

Act as a *[grade level]* teacher writing a family update after the first week of school. Create a short message that shares what the class learned, one moment worth celebrating, and what's coming next. Leave space for reminders and important dates.

Take the stress out of curriculum night

Act as an experienced *[grade level]* teacher preparing for curriculum night. Create a friendly outline for a *[length]*-minute presentation covering what students will learn, classroom routines, communication, and how families can support learning at home. Include a warm opening and time for questions.

Find your "wow!": From small wins to big breakthroughs, see what's possible for your classrooms, schools, and students this school year.

Save time now and later

Do a little planning now to make the first busy weeks of school much more manageable.

Paste your prompt into Raina.

Ask Raina anything...

To do:

Copy this prompt:

Build a just-in-case lesson

Act as a *[grade level] [subject]* teacher creating a substitute-ready lesson on *[topic or skill]*. Design a complete *[length]*-minute lesson with simple directions, minimal materials, an independent activity, and an answer key or guide. Make it easy for any substitute to pick up and teach.

Create your go-to family email bank

Act as a thoughtful *[grade level]* teacher. Write five warm, reusable family email templates for celebrating progress, missing work, classroom concerns, deadline reminders, and check-ins. Make each easy to personalize, then translate them into *[languages represented in your classroom]*.

Make weekly planning easier

Act as an instructional coach helping a *[grade level] [subject]* teacher. Create a reusable weekly planning template with space for learning goals, lessons, materials, checks for understanding, student support, and reminders. Keep it simple enough that I'll actually use it.

Keep students who finish early happily learning

Act as a *[grade level] [subject]* teacher. Create a menu of 10 meaningful early-finisher activities connected to *[subject or skill]*. Make them easy for students to begin independently, light on materials, and more engaging than "find something quiet to do."

Set expectations for classroom AI

Give students clear, age-appropriate guidance on when AI can help and when their own thinking needs to lead the way.

Paste your prompt into Raina.

Ask Raina anything...

To do:

Copy this prompt:

Create your classroom AI playbook

Act as a *[grade level]* teacher establishing expectations for responsible AI use. Draft a student-friendly classroom playbook explaining when AI may be used, when students should work independently, and how they should share AI's role in their work. Keep it clear, positive, and age-appropriate.

Spell out the AI ground rules

Act as a *[grade level] [subject]* teacher creating AI guidance for an assignment on *[topic]*. Write a short statement explaining which uses are allowed, which aren't, and what students need to complete independently. Include one example of AI lending a helpful hand and one example of AI doing too much of the thinking.

Put AI answers to the test

Act as a teacher helping *[grade level]* students become thoughtful AI users. Create a short activity in which students investigate an AI-generated response for accuracy, missing context, bias, and unsupported claims. Include a sample response, four discussion questions, and a fun "final verdict" students can give the answer.

Keep student thinking in the spotlight

Act as an instructional coach. Review the following assignment and identify where students' own thinking matters most. Suggest appropriate ways AI could support the work without taking over. Provide a revised assignment and clear, student-friendly AI guidance.
[Insert assignment]
